## GREAT SOUTHERN ELECTRICAL

### CAPABILITY STATEMENT

### COMPANY PROFILE

Great Southern Electrical specialises in extending overhead and underground electricity networks, installation of reticulation for commercial and residential subdivisions, authorised service provider for private High Voltage sites and communications including NBN Pit and pipe design and install.

Established in November 2005, Great Southern Electrical employs a group of qualified lineworkers, underground cable jointers, design engineers and electricians to work across Southern NSW.

Great Southern Electrical is accredited to perform Level 1, 2 and 3 Contestable Works within the Essential Energy and Endeavour Energy (design and construct), with similar accreditation for ActewAGL / Evoenergy, Ausnet Services and Powercor/Citipower networks. The design component is achieved by utilising the Great Southern Electrical subsidiary TFL Consulting and Design, allowing for a more seamless design and construct process.

GSE provides a consultancy service to ensure that the best possible routing of proposed infrastructure is achieved in consultation with our client/s, affected land holders and network operators. Our dedicated Electrical Engineers draft electrical designs for submission to several network operators including Essential Energy and Endeavour Energy. Where necessary, we complete Environmental Documentation and notifications to the local authority for comment.

Training is a major priority within Great Southern Electrical because of the dangerous and technical nature of the work. Training needs are identified and training is provided to ensure that all personnel have the specific skills and competencies to perform their work. Employees attend annual training including Electrical Safety Industry regulations. This reflects in our customer's satisfaction when projects are delivered in a safe, environmentally friendly and quality compliant manner.

Great Southern Electrical is the "High Voltage Responsible Entity" for approx. 40 private high voltage sites throughout NSW, providing regular HV/LV expertise, audits and maintenance.

In recognition of Great Southern Electricals professionalism and experience in electrical design and construction, our company was awarded the NECA "Excellence Award" – State Winner – 2013 for the design and construction project at Websters Walnuts near Leeton NSW.

## SERVICES

Great Southern Electrical offer a range of customer focussed and specialist services, including -

### New Connections, Line Diversion, Connection Upgrades, Overhead to Underground Conversions

Great Southern Electrical are accredited to perform construction services associated with new and/or existing connections, in-line with each respective network operator requirements.

### Design

Great Southern Electrical have a number of qualified electrical engineers who design electrical plans and high voltage networks for customers, compliant with network operator's requirements

### Project Management

Great Southern Electrical manage every project through their experienced and qualified team of project managers. Regardless of size, the project management team deliver a managed outcome – so customers have confidence that their project will be delivered with quality and value.

### HV Site Maintenance

Large electricity users who choose to operate their own on-site high voltage assets require a highly skilled and experienced service delivery. Great Southern Electrical provide maintenance services for private high voltage site customers; backed-up by a 24/7 on-call support service.

## PROJECTS

Great Southern Electrical has completed in excess of 1,000 construction projects over a 20-year period; many of these projects also being designed by our TFL Consulting and Design qualified engineers.

Projects include:

### **Shaw Projects – Murrumbateman NSW**

Design and construct high voltage for multiple residential and commercial land developments.

### **Wumbulgal Intermodal Hub NSW**

Design and construct high voltage connection for multiple users of Road/Rail intermodal development.

### **Agri-Australis (Ferrero Rocher) Sandigo NSW**

Design and construct and re-build 15kms of distribution line for a major hazelnut development.

### **Roads & Maritime Services – Rail Truck by-pass NSW**

Design and construct high voltage provision for road/rail truck by-pass.

### **Rivcott Riverina NSW**

Design and construct high voltage reticulation for a new cotton gin.

## OUR CUSTOMERS INCLUDE:

Australian Defence Force	Gundagai Meat Processors	Casella Wines	Charles Sturt University
NSW State Government Agencies	Multiple Local Government Authorities	Goldenfields Water County Council	NSW Roads & Maritime Services
Junee Abattoirs	McWilliams Wines	Carter Holt Harvey	Optus
Murrumbidgee Irrigation	Snowy Hydro Limited	Essential Energy(NSW)	Endeavour Energy(NSW)
Baiada Poultry	ActewAGL/Evoenergy(ACT)	Telstra	Vodafone
Hilltop Meats	Citipower(VIC)	Powercor(VIC)	Ausnet Services(VIC)

## OUR FLEET

Great Southern Electricals' fleet of Plant and Equipment is second to none in the region. A comprehensive fleet allows us to effectively and efficiently deliver projects with the highest quality and on time. Some of our fleet includes:

- Elevated Work Platforms (EWP's)
- Crane Borer Trucks
- Dingo & Telehandler
- Pole Trailers
- Cable Trailers
- Over 15 light vehicles

## MANAGEMENT SYSTEMS

Our management and employees are committed to providing quality services delivered with full consideration for safety and the environment. We ensure the same high standards from those contractors that undertake work for us.

Great Southern Electrical operates under the International Standards Organisation system management, including -

- Integrated Business Management System
- Quality ISO9001:2015
- OHS AS/NZS 4801:2001
- Environmental ISO14001:2015

Our policies and procedures ensure that our management and employees are committed to providing quality services delivered with full consideration for safety and the environment. We ensure the same high standards from those contractors that undertake work for us.

## INSURANCES

- WorkCover
- Public and Products Liability insurance
- Professional indemnity insurance
- Heavy vehicles insurance
- Light Vehicles insurance
- Management Liability insurance

## ACCREDITATIONS

### New South Wales

Level 1 - High & Low Voltage Power Line Construction

- *Extending High Voltage and Low Voltage overhead and underground electrical networks*
- *Increase capacity of existing electrical networks*

Level 2 - Metering Connection to Essential Energy & Endeavour Energy Networks

- *Disconnecting premises from the network*
- *Installing underground and overhead services line to connect your premises*

Level 3 - Design of Level 1 and Level 2 works

### Australian Capital Territory

ActewAGL

Evoenergy

### Victoria

Powercor / Citipower

Ausnet Services
